THE KEY STAGE 4 CURRICULUM (YEAR 9, 10 AND 11)

Overview

In September 2024, you will start the most important part of your education so far – Key Stage 4.

The purpose of this booklet is to help you find out more about the curriculum on offer for the next three years.

Part of this curriculum is compulsory, meaning that every child in the country has to study it. This is the ‘statutory curriculum’, which is made up of the following subjects:

GCSE English Language
GCSE English Literature
GCSE Mathematics
GCSE Science
GCSE Religious Studies
Games (Statutory exercise, no qualification)
PSHE/RSE (Statutory requirement, no qualification)

The remainder of the subjects will be chosen as ‘options’. We have put a framework in place to ensure that all students opt for subjects that will enable them to study a broad and balanced curriculum, which also reflects their own personal interests, abilities, aptitudes and talents. This will leave them with lots of opportunities open to them when you leave school.

You will be told which profile you have been assigned to. Each student is assigned to the profile that is most appropriate to them, based on a detailed analysis of their data and a range of other factors. Details of this are in the letter that was sent home at the same time as this booklet. We do this so that you are able to select the courses that are most appropriate for you within each subject area.

In order to ensure that the curriculum being followed offers breadth and balance, our options framework is structured in a way that enables all pupils to study subjects in a range of curriculum areas, have the opportunity to take all of the EBacc subjects, and to select subjects that are relevant to any future career / academic plans, while still providing an element of free choice.

Details of all courses are included in this booklet.

THE KEY STAGE 4 CURRICULUM (YEAR 9, 10 AND 11)

Ebacc

The EBacc is not a qualification. It is a set of subjects at GCSE that keeps young people's options open for further study and future careers. The EBacc is:

English language and literature

Maths

The Sciences

Geography or History

A language

The EBacc is made up of the subjects which are considered essential to many degrees and open up lots of doors. Research shows that a pupil's socio-economic background impacts the subjects they choose at GCSE, and that this determines their opportunities beyond school. A study by the UCL Institute of Education shows that studying subjects included in the EBacc provides students with greater opportunities in further education and increases the likelihood that a pupil will stay on in full-time education. Sutton Trust research reveals that studying the EBacc can help improve a young person's performance in English and maths.

Assessment

At the end of Year 11, you will have your public examinations. This booklet gives you details about the Assessment System for each subject. In addition, it will give you some ideas about the content that will be studied, and the skills that you will develop by studying each subject.

The Curriculum Structure

There are 50 one – hour teaching periods in our timetable, which runs over two weeks (10 school days). A total of 30 teaching periods is allocated to these subjects:

Subject	Hours each fortnight
English	7
Mathematics	7
Science	7
Religious Studies	4
Physical Education / Games (core only)	3
Personal Development / PSHE	2

In addition to this, you will pick four option subjects. Each of these has 5 teaching hours each fortnight.

The option subjects are organised into Option Blocks, each of which offers a range of different subjects. Students select one subject from each block. This helps to ensure that students study a broad and balanced curriculum, as well as offering opportunities for progression to a wide range of post – 16 pathways. Students also need to select a reserve option.

Please note that there will be additional opportunities available to students in each profile, that do not form part of the option block structure.

Careers Advice

Choosing a suitable Key Stage 4 curriculum is all part of the process of planning for future careers or study. You will be asked about this during your options interview. You are also able to access the careers office. Mrs Wooller is available to answer any queries and offer advice. Her email address is ewooller@littleheath.org.uk

LHS Key Stage 4 Curriculum Model – from September 2024

MASTER MODEL			
Key Stage 4 Option Choices available across all profiles			
A	B	C	D
ASDAN	GCSE Art	ASDAN	GCSE Art
GCSE 3D Design	ASDAN	BTEC Child Development	ASDAN
GCSE Business	GCSE Drama	GCSE Citizenship	BTEC Business Enterprise
BTEC Business Enterprise	GCSE French	GCSE Drama	GCSE Business Studies
GCSE Computing	GCSE German	GCSE Geography	BTEC Child Development
GCSE Design & Tech.	GCSE Music	GCSE History	GCSE Computing
GCSE Food & Nutrition	GCSE PE	BTEC ICT	GCSE Food & Nutrition
GCSE History	GCSE Spanish	GCSE Media	GCSE French
BTEC Hospitality & Catering	FCSE Spanish		
GCSE Media	Cambridge National Sports Studies	GCSE PE	GCSE Geography
GCSE Triple Science	GCSE Textiles	Cambridge National Sports Studies	GCSE Spanish
	GCSE Triple Science	BTEC Travel & Tourism	
Core subjects: GCSE English Language and GCSE English Literature, GCSE Mathematics; GCSE RE, GCSE Combined Science; Core PE; PSHE/RSE			
Additional opportunities: GCSE Further Maths; ASDAN; Alternative Provision; extra curricular; super curricular			

Option Blocks

The courses that are offered in each of the Option Blocks vary according to your assigned profile, however, all students are able to access a range of appropriate courses in all subjects.

Red Profile

Students who are assigned to this profile will take four subjects from a selection of traditional GCSE courses.

They will not study any vocational courses.

RED PROFILE			
4 Option choices from a selection of traditional subjects; no vocational choices.			
A	B	C	D
GCSE Business Studies	GCSE Art	GCSE Citizenship	GCSE Art
GCSE Computing	GCSE Drama	GCSE Drama	GCSE Business Studies
GCSE Design & Tech.	GCSE French	GCSE Geography	GCSE Computing
GCSE Food & Nutrition	GCSE German	GCSE History	GCSE Food & Nutrition
GCSE History	GCSE Music	GCSE Media	GCSE French
GCSE Media	GCSE PE	GCSE PE	GCSE Geography
GCSE Triple Science	GCSE Spanish		GCSE Spanish
	GCSE Textiles		
	GCSE Triple Science		
Core subjects: GCSE English Language and GCSE English Literature, GCSE Mathematics; GCSE RE, GCSE Combined Science; Core PE; PSHE/RSE			
Additional opportunities: GCSE Further Maths; extra curricular; super curricular			

Students in this group, who are also in set 1 or 2 for science, are invited to opt for Triple Science.

If they opt for this, it would mean that they would only have three other choices. Triple Science is not required in order to study any of the A Level Sciences or a Science related degree. It is an additional opportunity for students who are keen to study this course.

Yellow Profile

Students who are assigned to this profile will take four subjects from a selection of mostly traditional GCSE courses.

They may be advised to take a maximum of one vocational course.

YELLOW PROFILE			
4 Option choices from a selection of mostly traditional subjects and may be advised to take a maximum of 1 vocational choice.

Additional opportunities: ASDAN including Functional Skills English and Mathematics; Alternative Provision; extra curricular; super curricular			

The Key Stage 4 Grading System

Students are no longer awarded grades A* to U at GCSE, which is what you may have heard of. Instead, you will be graded according to the new system. The table below shows what each of the new grades means, based on the new and old systems:

Old A* - U GCSE grades	New 9 – 1 GCSE grades	Equivalent new Level 2 / Level 1 grades (vocational courses)
A*	9	L2 – Distinction* (8.5)
A	8	L2 – Distinction (7)
	7	
B	6	L2 – Merit (5.5)
C	5	L2 – Pass (4)
	4	
D	3	L1 – Distinction* (3)
E	2	L1 – Distinction (2)
F	1	L1 – Merit (1.5)
G		L1 – Pass (1)
U	U	U

The GCSE Options Process

The Options process starts in Term 3. Year 8 students will participate in a range of activities to support them in making their choices.

Date	Event
Monday 19 th February	Assembly An Introduction to the Options Process Assembly for Year 8 delivered by Mrs Whitford and Mr Coulson
Tuesday 20 th Feb	Information Evening – 6pm in the Main Hall This will provide a more detailed explanation of the Options process, courses and pathways, and what this means for your child. You will have an opportunity to ask questions and find out more about the courses we offer Please complete this short form to confirm your attendance: https://forms.office.com/e/iYtWnCN2U1
Friday 23 rd February	Options Information Booklet The LHS Options booklet will be sent home electronically. It will also be posted on the website and on Satchel One. This contains details of all the courses that are offered, and how the profiles are identified. This will be sent out together with a letter confirming the profile that each student will be following.
Week beginning: 26 th February onwards	Tutor time activities to support the GCSE Options process This will include the opportunity to speak to HODs of the subjects which are offered as GCSE subjects, as well as students who currently study them. Students will also be offered support and guidance by their Form Tutor, to support them in making their choices.
Week beginning: 4 th March onwards	Taster activities Students will be invited to attend additional taster lessons in new subjects at GCSE (German, Spanish, Drama, Business Studies, Child Development, Leisure and Tourism, Citizenship, Media and Hospitality).
Week beginning 11 th March – 22 nd March	Applications These will be completed online. Details of this will be sent out nearer the time. Deadline: Friday 22 nd March
Week beginning 18 th March onwards	Options Interviews Each student will attend an individual Options Meeting with a member of the Pastoral or Curriculum Team. During these meetings, choices which have been made during the initial application process will be reviewed with students.
Week beginning 15 th April	Follow up conversations and Quality Assurance
	Confirmation of GCSE course places Students will receive written confirmation of their course choices at the end of the process

Subject:	Art
Course:	Art, Craft and Design
Exam board:	AQA
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
<p>On this course you will have the opportunity to try all disciplines of Art and Design, including drawing, painting, sculpture, graphic illustration and textiles. You will explore a variety of themes, issues and ideas. You will learn how to create artwork in exciting and expressive ways as well as learning how to produce more detailed observational work. You will also be introduced to a wide range of artists from old masters to more contemporary work to help inspire you. In Year 9 you will complete several short practical projects that are designed to develop your skills in a wide range of processes. These initial projects help to introduce you to the wide range of options the subject has to offer, and you can specialise in your preferred techniques and themes later in Years 10 and 11.</p>	
Who is this course suitable for?	
<p>Creative students who are prepared to work hard and who really enjoy the subject. Students also often find they like having a balance between their academic work and something practical. You must be prepared to work hard in lessons and also independently, you should have a passion for Art and be prepared to try something new. A desire to broaden your knowledge of the subject through research is also essential.</p>	
How is it assessed?	
<p>During the course you will produce a portfolio of coursework which includes two extended practical projects. This coursework is worth 60% of your final grade. You will also do a final exam project at the end of Year 11, for which you will create a short practical project based on one of several starting points set by the exam board. This ends with a 10 hour (two day) practical exam in which you will create a final piece to the project. Your work will be assessed in four different areas:</p> <ol style="list-style-type: none"> 1. The recording of your ideas and observations. 2. The refinement and exploration of your ideas. 3. The development of your ideas through investigations. 4. The personal response (final pieces) you create based on the artist you choose to study. 	
How will we study the subject? What are lessons like?	
<p>The curriculum is taught through a series of practical projects that students produce in lessons and at home. Your teachers will give you lots of advice and technical guidance with your practical work and how to develop your ideas. You also have a lot of scope to be very personal and independent with the work you produce, especially in Year 10 and 11.</p> <p>The exam board (AQA) also require that all students include some writing in their sketchbooks. You will do this by writing your thoughts about an artist's work and by annotating your ideas about your own work as it develops.</p>	
What skills will I develop if I study this subject?	
<p>You develop your practical skills by experimenting with a wide range of materials and techniques such as drawing, painting, sculpture, printmaking, graphics and textiles.</p> <p>You will be taught how to create work in exciting and expressive ways as well as learning how to produce detailed and accurate observational work. You will learn how to produce ambitious final outcomes which show influence from the artists you have studied. As well as developing your practical skills, you will also learn how to be more independent with your learning and how to manage deadlines.</p>	
What jobs / opportunities can this subject lead to in the future?	
<p>There are a huge number of job opportunities in the creative industries, they include: Architecture. Education. Media. Interior design. Photographer. Fine artist. Video game design Illustration. Graphic design</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>Students will be offered opportunities outside of normal lessons that will aid the progression and development of their work. For example, they can be invited to extra-curricular workshops they may experience an artist in residence and trips to galleries or other places from which to gain inspiration for their own work.</p>	
Where can I find out more information? / Key Contacts?	
<ul style="list-style-type: none"> • Talk to your Art teacher • Talk to Mrs Hutchinson (Key Stage 4 Leader of Art) • Talk to Mr Viner (Head of Art) 	

Subject:	Business
Course:	GCSE Business
Exam board:	Edexcel
Qualification:	GCSE
Profiles:	Red Yellow
What will I study during the course?	
<ul style="list-style-type: none"> You will be introduced to the world of small businesses and how these grow and develop into large successful enterprises and look at what makes someone a successful business person. As budding entrepreneurs you will see how to develop ideas, spot gaps in the market and turn that into a successful business. Assessing what makes an effective business and how to manage the financial side to ensure its success. You will also see how the world around us affects businesses. This could also be your first introduction to the understanding of Economics and the theory behind business success. 	
Who is this course suitable for?	
This is suitable for students who are passionate about the subject of Business and feel confident in the form assessment taking place purely through examinations.	
How is it assessed?	
<p>In GCSE Business you will have two papers, with equal weighing of 50%. Each paper is divided into three sections.</p> <ul style="list-style-type: none"> Section A: 35 marks. Section B: 30 marks. Section C: 25 marks. Students must answer all questions. The paper will consist of calculations, multiple-choice, short-answer and extended- writing questions. 	
How will we study the subject? What are lessons like?	
Lessons involve a mix of activities based around discussion of business case studies and scenarios. We are often advising businesses on what should be done through application of the business theory.	
What skills will I develop if I study this subject?	
Analytical and evaluative skills are vital in this subject and the in-depth discussions of lots of business stories and cases creates lots of opportunities for this.	
What jobs / opportunities can this subject lead to in the future?	
Students who study Business often go on to either set up in business for themselves, or working in the world of marketing, advertising, accounting or working as business managers, advisors or analysts.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
We run an enterprise programme in Y9 where students have the chance to compete with other schools for a £500 top prize by designing their own new product.	
Where can I find out more information? / Key Contacts?	
Speak with Mr Howlett (Head of Business) or Mr Melatos (Head of KS4 Business)	

Subject:	Business
Course:	Business and Enterprise & Marketing
Exam board:	OCR
Qualification:	Cambridge National (alternative to BTEC)
Profiles:	Yellow, Green, Blue
What will I study during the course?	
Enterprise and marketing concepts, designing a business proposal and marketing and pitching a business proposal.	
Who is this course suitable for?	
This is suitable for students who are passionate about the subject of business and like the mix of coursework, examinations and presenting to make up their final grade.	
How is it assessed?	
40% external examination and 60% coursework/presenting of coursework.	
How will we study the subject? What are lessons like?	
Students will be introduced to the theory of the course and taught the skills and requirements for the examination. Students will also complete assignments on computers in class that is their coursework where they have to help solve a business scenario through creative thinking and applying their own business ideas.	
What skills will I develop if I study this subject?	
The skills most frequently developed are problem solving and analytical skills. This is to help address the business scenario that forms part of the coursework and present on the concepts developed.	
What jobs / opportunities can this subject lead to in the future?	
Students who study business often go on to either set up in business for themselves, or working in the world of marketing, advertising, accounting or working as business managers, advisors or analysts.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
We take part in an enterprise programme in Y9 where students have the chance to compete with other schools for a £500 top prize by designing their own new product.	
Where can I find out more information? / Key Contacts?	
Speak to Mr Howlett (Head of Business) or Mr Melatos (Head of KS4 Business).	

Subject:	Citizenship
Course:	Citizenship Studies
Exam board:	AQA
Qualification:	GCSE
Profiles:	Red , Yellow
What will I study during the course?	
GCSE Citizenship Studies has the power to motivate and enable young people to become thoughtful, active citizens. Students will gain a deeper knowledge concerning democracy, government and law. They will develop skills to create sustained and reasoned arguments, present various viewpoints and plan practical citizenship actions to benefit our society. They will also gain the ability to recognise bias, critically evaluate argument, weigh evidence and look for alternative interpretations and sources of evidence, all of which are essential skills valued by higher education and employers.	
Who is this course suitable for?	
This course is suitable for any proactive, opinionated and ambitious pupil who has an interest in society, law, government and politics, who enjoys debating and communicating with others. This course offers an opportunity to further explore some of the topics that were discussed in your Personal Development (PSHE) lessons. It would complement studies in History, Geography, Business and Child Development.	
How is it assessed?	
Citizenship Studies will be assessed in two examinations which will be taken in the summer of the final year of the course, each examination weighing 50% of the overall course grade.	
<ul style="list-style-type: none"> • Paper 1: Active Citizenship and Politics and Participation. • Paper 2: Life in Modern Britain and Rights and Responsibilities. 	
How will we study the subject? What are lessons like?	
Across five lessons a fortnight, we will work through the curriculum, deepening skills in verbal discussions and written work. Lessons will consist of a variety of activities that will challenge, support and teach a rich and detailed curriculum. Often times, you may need to present your findings to a small group or the whole class.	
What skills will I develop if I study this subject?	
You will develop skills on how to debate in a fair way; recognise bias; how to evaluate evidence; how to formulate a strong argument.	
What jobs / opportunities can this subject lead to in the future?	
Barrister, Law, Solicitor, Social Worker, Doctor, Nurse, Teacher.	
Strong links with Politics, Sociology, Economics, Business, Philosophy at A Level, and BTEC Health and Social Care.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
Citizenship Studies will explore real life opportunities, where you can expand your knowledge beyond the course, this may involve trips and/or talks/visits from speakers from the world outside of school. This course encourages participation in Debate Club, where you will improve your debate skills. Trips may consist of visiting local councils, trips to Reading magistrate court, trips to London.	
Where can I find out more information? / Key Contacts?	
Email / speak to Miss Burrows (Head of Citizenship and Leader of Personal Development)	

Subject:	Design and Technology
Course:	GCSE Art & Design: Textiles
Exam board:	AQA
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
<p>During this course students will explore a variety of themes, issues and ideas. They will experiment with a wide range of materials and techniques ranging from more traditional processes such as; dyeing, printing, fabric manipulation and embroidery to the use of new Technologies like the laser cutter and experimental techniques such as trapping and fusing the heat press.</p> <ul style="list-style-type: none"> • How sources relate to cultural, social, historical, contemporary, environmental and creative contexts which might be determined or influenced by functional or non-functional considerations how ideas, feelings, forms, and purposes can generate responses that address personal needs or meet external requirements, such as client expectations and any associated constraints. • They will learn about creating work in exciting and expressive ways as well as learning how to effectively record their ideas and observations. They will develop their understanding of line, tone, colour, texture, pattern and shape using a range of media and techniques. • They will be introduced to a wide range of artists and designers, looking at the History of Textiles and more contemporary work. They will be expected, once they have gained confidence in their skills, to develop their own work in the style of artists and designers appropriate to their chosen area to study. • Students will produce creative final outcomes which have a clear link to the artist and Designers they have studied. 	
Who is this course suitable for?	
<p>Students must be prepared to work hard in lessons as well as independently. They should have a passion for Textiles and be prepared to try out new skills. A desire to broaden their knowledge of the subject through research is also essential.</p>	
How is it assessed?	
<p>Component 1: Students will produce a portfolio of Textiles practical work showing a response to a personal theme. This portfolio of coursework is worth 60% of the final grade.</p> <p>Component 2: Externally Set Task is an early release paper from the exam board (AQA) issued at the beginning of January in Year 11 and will provide students with six themes, each with a range of written and visual starting points. Students respond to one of the questions and produce a portfolio of work including a final piece. This externally set task is worth 40% of the final grade.</p>	
How will we study the subject? What are lessons like?	
<p>Lessons can range from one off practical activities to broaden the skills and knowledge of students to developing research and analytical skills. Students will also work on longer sustained projects where they will apply knowledge and skills learnt to create a personal outcome. The larger projects of coursework are an extended body of work that shows their thinking and working processes and will include:</p> <ul style="list-style-type: none"> • Research from books, magazines, websites, museums, galleries etc. • Students will create work which references and responds the work of others. • Experimentation using a range of materials, resulting in selection of most successful outcomes to take forward. • A range of design ideas in order to develop a final piece. • AQA require that all students provide written evidence within their sketchbooks. This can be in the form of the analysis of an artist or designers work or annotating their work. 	
What skills will I develop if I study this subject?	
What jobs / opportunities can this subject lead to in the future?	
<p>Fashion designer, fashion illustrator, interior designer, accessory designer, set dresser, design director, design strategist, theatrical designer, artist, concept artist, creative officer to name but a few pathways studying GCSE Textiles can take you.</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>There will be opportunities to attend trips that support the research element of the course and visiting guests from across the industry.</p>	
Where can I find out more information? / Key Contacts?	
<p>There will be opportunities to attend trips that support the research element of the course and visiting guests from across the industry.</p>	

Subject:	Design and Technology
Course:	GCSE Art & Design: 3D Design
Exam board:	AQA
Qualification:	GCSE
Profiles:	Yellow, Green, Blue
What will I study during the course?	
<p>GCSE 3D Design is a broad ranging subject that explores a variety of processes and disciplines all with three dimensional outcomes. Students will explore architecture, product design, set and prop creation and jewellery together with more traditional sculpture forms. Students will work with a range of materials including wood, metal, plastic, paper & boards and textiles to develop prototypes and models. Students will have the opportunity to work with Computer Aided Design (CAD) programmes to explore concepts and communicate their ideas. Drawing and research skills are fundamental to the course in allowing students to be imaginative and ambitious. We will explore a range of cultures, styles and designers to inspire how their own projects develop. Students will be guided through a range of projects in year 9 to develop their key skills and explore different design pathways. In Year 10, students are then given the opportunity to focus on their own areas of interest and develop skills in a pathway and materials that suits them. Students are encouraged to build an understanding of visual language (shape, form, line, scale and colour) and develop their communication skills through experimenting with materials and being open to taking design risks.</p>	
Who is this course suitable for?	
<p>This course is aimed at students that wish to explore the creative side of technology, experimenting with a range of materials to develop personal and imaginative outcomes. Students must be prepared to work hard in lessons as well as independently. They should have a passion for design and be prepared to try out new skills in a range of materials. A desire to broaden their knowledge of the subject through research is also essential.</p>	
How is it assessed?	
<p>Component 1: Students will produce a portfolio of primarily 3D practical work showing a response to a personal theme. This portfolio of coursework is worth 60% of the final grade.</p> <p>Component 2: Externally Set Task is an early release paper from the exam board (AQA) issued at the beginning of January in Year 11 and will provide students with six themes, each with a range of written and visual starting points. Students respond to one of the questions and produce a portfolio of work including a final piece. This externally set task is worth 40% of the final grade.</p>	
How will we study the subject? What are lessons like?	
<p>Lessons can range from one off practical activities to broaden the skills and knowledge of students to developing research and analytical skills. Students will also work on longer sustained projects where they will apply knowledge and skills learnt to create a personal outcome. The larger projects of coursework are an extended body of work that shows their thinking and working processes and will include:</p> <ul style="list-style-type: none"> • Research from books, magazines, websites, museums, galleries etc. • Students will create work which references and responds the work of others. • Experimentation using a range of materials, resulting in selection of most successful outcomes to take forward. • A range of design ideas in order to develop a final outcome. • AQA require that all students provide written evidence within their portfolio. This can be in the form of the analysis of an artist or designers work or annotating their work. 	
What skills will I develop if I study this subject?	
Practical and analytical skills, problem solving	
What jobs / opportunities can this subject lead to in the future?	
There are many pathways available to students studying 3D Design including product designer, graphic designer, jeweller, set designer, architect, prop designer, furniture designer and sculptor.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
There will be opportunities to attend trips that support the research element of the course and visiting guests from across the industry.

Subject:	Design and Technology
Course:	GCSE Design & Technology
Exam board:	AQA
Qualification:	GCSE
Profiles:	Red Yellow
What will I study during the course?	
<p>During this course, you will learn to design products for a customer, considering their needs and wants. You will develop knowledge of a range of materials including wood, metal, plastic, paper & board and textiles. You will learn and develop your technical drawing skills as well as an understanding of graphic communication and visual language to communicate your ideas. You will learn about the development and evolution of products, and use research into existing designers and products to inform your designs. You will have the opportunity to develop computer aided design (CAD) skills through industry used software. You will investigate alternative solutions to problems and use model making to test your ideas and then evaluate your ideas using a specification and client feedback. You will learn how to use a range of hand and power tools including CAM (laser cutter, 3D printer and our brand new CNC router) to create products. You will also work with a wide range of materials including electronics to create fully functioning products.</p>	
Who is this course suitable for?	
<p>The technical knowledge and materials focus of this course is suited to students that interested in understanding how products are developed and manufactured. Students must be prepared to work hard in lessons as well as independently. They should be willing to work with a range of materials, developing skills in accuracy and applying knowledge to developing their own products.</p>	
How is it assessed?	
<p>Component 1: Written examination (50%) 2 hours Maths based questions make up 15% of the written paper and through the theory there are also strong links to physics. Component 2: Non-Examined Assessment (50%) Students will undertake a project based on a contextual challenge released by AQA starting in the summer term of Year 10. Students are provided with a choice of three starting points to research and respond to. This is a substantial design and make project incorporating applied theory.</p>	
How will we study the subject? What are lessons like?	
<p>Lessons will range from a one-off practical activity to apply theory and knowledge learnt to research based tasks leading to product development and making. Learning takes place in both the workshop and computer suite. Whilst we endeavour to include as much practical into the teaching of the theory work as possible, students should be mindful there is a large amount of written work in the course.</p>	
What skills will I develop if I study this subject?	
<p>Careers - Graphic Designer, Architect, Product Design and Development, Mechanical Engineer, Software Programmer... The nature of the skills developed means that Design Technology is a perfect stepping-stone for any career with creative, analytical and problem-solving attributes.</p>	
What jobs / opportunities can this subject lead to in the future?	
<p>The nature of the skills developed means that Design Technology is a perfect stepping-stone for any career with creative, analytical and problem-solving attributes.</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>There will be opportunities to attend trips that support the research element of the course and visiting guests from across the industry.</p>

Subject:	Design and Technology
Course:	GCSE Food Preparation & Nutrition
Exam board:	AQA
Qualification:	GCSE
Profiles:	Red Yellow
What will I study during the course?	
<p>GCSE Food Preparation and Nutrition should enable students to:</p> <ul style="list-style-type: none"> • Demonstrate effective and safe cooking skills by planning, preparing and cooking using a variety of food commodities, cooking techniques and equipment. • Develop knowledge and understanding of the science of food. • Understand the relationship between diet, nutrition and health. • Demonstrate knowledge of the principles of nutrition including the role of the main nutrients in the diet, sources, function, deficiency diseases and sensory qualities. • Understand the importance of microbiological food safety considerations when preparing, processing, storing, cooking and serving food. • Explore where food comes from including foods from around the world. GCSE Food Preparation and Nutrition is an interesting and stimulating course for students. <p>The delivery of the course material will vary: group based activities, practical and theory based learning, independent based learning in order to produce project style and research based work.</p>	
Who is this course suitable for?	
<p>Students should have a keen interest in food, and be open to investigating and tasting different foods. Students should be motivated to improve their knowledge of nutrition, diet and health. Students will build upon their practical skills and techniques in order to produce the work that reflects their creativity in Food Preparation and Nutrition.</p>	
How is it assessed?	
<p>Component 1: Written examination (50%) 1 hour 45 minutes Component 2: Non-Examined Assessment (50%) Students will undertake two NEA projects during Year 11 based on topics provided by AQA. NEA 1 (15%) is a Food Investigation and NEA 2 (35%) is a Food Preparation Assessment when students plan, prepare, cook and evaluate 3 final dishes.</p>	
How will we study the subject? What are lessons like?	
<p>Lessons will range from a practical activity to apply theory and knowledge learnt to research based tasks leading to dish development and making. Students will be required to bring ingredients for all practical lessons. Typically, practical lessons happen once a week. Whilst we endeavour to include as much practical into the teaching of the theory work as possible, students should be mindful there is a large amount of written work in the course.</p>	
What jobs / opportunities can this subject lead to in the future?	
<p>Nutritionist, Chef, Advertising, Teaching, Dietician, Child Development, Product Development, Food Manufacturing, Hospitality, Food Science, Health and Social Care, Social Work, Research and development, Government Agencies, Counselling.</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>There will be opportunities to attend trips that support the research element of the course and visiting guests from across the industry.</p>

Subject:	Design and Technology
Course:	Level 1/2 Hospitality & Catering
Exam board:	WJEC
Qualification:	BTEC
Profiles:	Yellow, Green, Blue
What will I study during the course?	
<p>A qualification in Hospitality and Catering will prepare you to become more aware of the skills required to go into hospitality and catering for large-scale events. In this qualification, learners will also have the opportunity to develop their food preparation and cooking skills as well as transferable skills of problem solving, organisation and time management, planning and communication. Through the two units, learners will gain an overview of the hospitality and catering industry and the type of job roles that may be available to assist them in making choices about progression. Students will study two mandatory units, covering the fundamental knowledge, skills and understanding required for the hospitality and catering industry. Unit 1 covers the catering industry, ranging from types of establishment, customer service, the operation of the kitchen, restaurant, health and safety, and food safety. Unit 2 looks at research and planning suitable dishes for a menu for a specified restaurant, which also includes a practical examination to showcase some of the chosen dishes.</p>	
Who is this course suitable for?	
<p>Students should have a keen interest in food but also want to learn more about what it takes to work in a top hotel or restaurant or what skills are required to work front of house. This is an exciting course to understand a career path into industry as well as experimenting with flavours, developing technical cookery techniques and high quality presentation skills.</p>	
How is it assessed?	
<p>Unit 1: The Hospitality and Catering Industry written examination (50%) 90 minutes Unit 2: Hospitality and Catering in Action practical assessment (50%) This will be a practical exam where students will have been tasked to produce a variety of dishes and outcomes to a set brief in exam conditions. Students will produce a research folder showing their planning and management of ingredients. The brief is set by the exam board (WJEC).</p>	
How will we study the subject? What are lessons like?	
<p>Lessons will range from a practical activity to apply theory and knowledge learnt to research based tasks leading to dish development and making. Students will be required to bring ingredients for all practical lessons. Typically, practical lessons happen once a week. Whilst we endeavour to include as much practical into the teaching of the theory work as possible, students should be mindful there is a large amount of written work in the course.</p>	
What jobs / opportunities can this subject lead to in the future?	
<p>This subject can lead to further study at level 3 of academic and/or vocational qualifications in the hospitality and catering industry and apprenticeships. Chef, development chef, catering manager, caterer / events planner, dietician, food stylist (advertising), restaurant manager, food technologist, new product development, and teacher.</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>There will be opportunities to attend trips that support the research element of the course and visiting guests from across the industry.</p>	
Where can I find out more information? / Key Contacts?	
<p>Talk to your Technology teachers Talk to Miss Jackson (Key Stage 4 Leader of Technology) Talk to Miss Bell (Key Stage 4 teacher of Hospitality) Talk to Mrs Meader (Head of Technology)</p>	

Subject:	Drama
Course:	GCSE Drama
Exam board:	OCR
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
Different styles of theatre. A set text. Acting techniques. Technical elements. Evaluating theatre. Creating original theatre.	
Who is this course suitable for?	
<p>You will enjoy this course if you like:</p> <ul style="list-style-type: none"> • Creating scenes, exploring plays, studying scripts or experimenting with lighting/sound. • Evaluating other people's work in a positive and constructive manner. • Directing other people's acting. • Working on your own practical acting skills. • Being creative and original (thinking about the use of space, colours, costumes, props, lighting, body language, facial expressions, etc). • A mixture of practical and written work. 	
How is it assessed?	
<p>Devising Drama - You will work in groups to create a devised performance based on a stimuli given to you by your teacher. You will log your process in a portfolio evidencing and evaluating the creative decisions you have made throughout the unit. Both the performance and portfolio are assessed. Presenting and Performing Texts - You will study and explore a text during the lessons, participating in workshops to develop your understanding of character, plot, style and drama techniques. This unit will culminate in a practical performance of two extracts from the play that you have studied. Drama: Performance and Response - You will study and explore a text chosen by the exam board during the lessons, participating in workshops to develop your understanding of SCLP, character, staging, technical elements, style and performance skills. This understanding will be assessed in a written exam at the end of Year 11. During Year 11 we will take you to see a professional play and you will complete a live theatre evaluation in the second part of the final written exam.</p>	
How will we study the subject? What are lessons like?	
<p>The lessons are a combination of practical and written. Initially you will have 4 practical lessons and 1 written lesson across a fortnight, but the amount of written lessons will increase around PPE's and exams. Lessons are always fun, engaging, challenging and supportive. We mainly work in groups which are either chosen by you or your teacher, so that you get to work with a range of different people. The main structure of the lessons will be learning a new skill, through and workshop and sometimes a professional example, then applying it to you own work. In lessons you will regularly perform in front of the class.</p>	
What skills will I develop if I study this subject?	
<p>Drama teaches you to work as part of a team. Here you will learn to balance ideas, work with and listen to others, evaluate your work and develop your organisational skills. In adult life, there will be many occasions where you will need to work as part of a team and studying Drama will equip you with these skills.</p> <ul style="list-style-type: none"> • Drama gives you the confidence to perform and present in front of others. When you go for job, college or university interviews, or lead a presentation at work, studying Drama will provide you with the required skills to communicate and deliver confidently in front of others. • In Drama you will need to improvise on a number of occasions. This allows you to think on your feet and develop your initiative. This will hold you in good stead when it comes to taking initiative and adapting in your future workplaces. Drama will teach you to be creative. It will encourage you to come up with exciting ideas and you will learn how to think outside the box. • You will learn to work towards a deadline. Drama will teach you to be disciplined in managing your time and developing the progress of your piece. • Analysing and evaluating theatre will develop your critical thinking. This is a useful skill that is transferable across a number of subjects. • When you act in Drama you put yourself in to another person's shoes and try to identify with them and their situation. This will develop your empathy towards others, especially when portraying a character that is experiencing feelings and situations that you may not initially understand. This is a key skill that will open your mind and develop your interaction skills. It is also an essential attribute to many careers such as teaching, nursing or caring. 	

What jobs / opportunities can this subject lead to in the future?

Drama is a subject which develops a huge range of transferable skills, therefore it would prepare you for any job that involves working with a team of people, speaking in front of people, being creative or thinking on your feet. However the most common jobs that GCSE Drama students go on to do are: Actor Theatre technician Director Casting director Lawyer Drama Therapist Primary School Teacher Nursery Nurse Secondary School Teacher Script Writer Casting Director Graphic Designer Marketing Manager Cabin Crew

What enrichment / extra - curricular opportunities are available to me if I study this subject?

Whilst on the GCSE Drama course we run a number of different theatre trips each year to a range of different types of theatre show. Trips can also sometimes involve backstage tours of theatres. Every cohort also has a workshop from a visiting professional theatre company to help them prepare for their first Drama assessment.

Subject:	English
Course:	GCSE English Language
Exam board:	AQA
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
You will experience a range of different learning activities such as: creative writing; discussions; critical analysis; analysing non-fiction texts; group reading; debates; individual, group work and much more.	
Who is this course suitable for?	
All students - this is a core subject that everyone will take.	
How is it assessed?	
2 externally assessed exams Paper 1 - Explorations in Creative Reading and Writing; Paper 2 - Writers' Viewpoints and Perspectives)	
Plus a Spoken Language assessment (a speech/presentation with discussion on a topic of choice) which will take place in class. Marked as Pass/Merit/Distinction. This currently takes place in Year 9.	
How will we study the subject? What are lessons like?	
There are 7 lessons a fortnight (in Year 9, changing to 8 in Years 10/11). Lessons will interweave English Language and English Literature depending on the unit(s) being taught.	
What skills will I develop if I study this subject?	
<p>read fluently, and with good understanding, a wide range of texts from the 19th, 20th and 21st centuries, including literature and literary non-fiction as well as other writing such as reviews and journalism;</p> <ul style="list-style-type: none"> • read and evaluate texts critically and make comparisons between texts; • summarise and synthesise information or ideas from texts; • use knowledge gained from wide reading to inform and improve their own writing; • write effectively and coherently using appropriate Standard English; • use grammar correctly and punctuate and spell accurately; • acquire and apply a wide vocabulary, alongside a knowledge and understanding of subject terminology, and linguistic conventions for reading, writing and spoken language. <p>If you have fallen out of the habit of reading inside/outside of school, get back into it! Any form of reading (novels, stories, magazines and newspaper articles, sports reports, information from the Internet) will generate new ideas, increase your vocabulary and help you in English.</p>	
What jobs / opportunities can this subject lead to in the future?	
<ul style="list-style-type: none"> • English is a very important subject which can help open a whole variety of post-school pathways. • It is a required subject for college and university courses. Success in English shows your future employers that you have both a creative and an analytical mind. Many students who do well in English will find work in media, creative arts, publishing and marketing, or even teaching! 	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>Writing/Reading club at lunchtime</p> <p>Revision workroom/workshops in Year 11</p>

Subject:	Geography
Course:	GCSE Geography
Exam board:	Edexcel
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
Human topics: Changing Cities, Global Development and Resource Management. Physical topics: The Changing Landscapes of the UK, Weather Hazards and Climate Change and Ecosystems, Biodiversity and Management.	
Who is this course suitable for?	
This is a course that is suitable for all students with a keen interest in the world around them. Geography has a focus on literacy and maths and students will be expected to complete mathematical calculations as well as to write in depth about different geographical case studies. Students will also carry out fieldwork and therefore need to want to see Geography in action, beyond the classroom and to get involved in fieldwork investigations.	
How is it assessed?	
<ul style="list-style-type: none"> • Paper 1 – The Physical Environment. 1 hour and 30 minutes = 37.5% • Paper 2 – The Human Environment. 1 hour and 30 minutes = 37.5% • Paper 3 – Geographical Investigations. 1 hour and 30 minutes = 25% 	
How will we study the subject? What are lessons like?	
<p>First, ask yourself the following questions:</p> <ol style="list-style-type: none"> 1. Do I enjoy learning about the world around me and my place in it? 2. Do I enjoy lessons that are fun but can also be quite challenging? 3. Do I want to study a subject that is valued highly by employers? 4. Do I want to study a subject that gets excellent exam results? 5. Do I like field trips? If the answer to any of these questions is yes, then Geography is the subject for you! <p>You will experience a variety of learning activities, traditionally taught lessons, using the computer suite to research ideas and present work, group tasks, individual project work and fieldwork outside the classroom</p>	
What skills will I develop if I study this subject?	
<ul style="list-style-type: none"> • Develop and extend your knowledge of locations, places, environments and processes, and of different scales including global; and of social, political and cultural contexts. • Gain understanding of the interactions between people and environments, change in places and processes over space and time, and the interrelationship between geographical phenomena at different scales and in different contexts i.e. think like a geographer! • Develop and extend your competence in a range of skills including those used in fieldwork, in using maps and Geographical Information Systems (GIS) and in researching secondary evidence, including digital sources. • Develop your competence in applying sound enquiry and investigative approaches to questions and hypotheses i.e. study like a geographer! • Apply geographical knowledge, understanding, skills and approaches appropriately and creatively to real world contexts, including fieldwork, and to contemporary situations and issues. • Develop well-evidenced arguments drawing on your geographical knowledge and understanding. • “Geography is life. It is impossible to conceive of rounded human beings who have not grasped the fundamentals of geography” Film Director and Chair General Teaching Council 	
What jobs / opportunities can this subject lead to in the future?	
<p>Holiday rep Hotel manager Hydrologist Landscaper Meteorologist Planner Social worker Surveyor Taxi driver Teacher Translator Travel agent Air Traffic Controller Civil Engineer Conservationist Cartographer Estate Agent Environmentalist Financial Adviser Foreign Correspondent Geologist Graphic Designer Architect Archaeologist</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
The department runs two field trips as part of the course where students visit the River Pang and Reading.	
Where can I find out more information? / Key Contacts?	
Please speak to your Geography teacher, or Mrs Park (Head of Geography) if you have any questions.	

Subject:	Geography
Course:	BTEC Level 1/Level 2 Tech Award in Travel and Tourism
Exam board:	Edexcel/ Pearson
Qualification:	BTEC
Profiles:	Yellow, Green, Blue
What will I study during the course?	
Component 1 travel and Tourism Organisations and Destinations. Component 2 Influences on Global Travel Tourism. Component 3 Customer Needs in travel and Tourism	
Who is this course suitable for?	
This course is for learners who want to acquire knowledge and technical skills through vocational contexts by exploring the aims of different travel and tourism organisations, the features of tourist destinations, how organisations meet customer requirements, and the influences on global travel and tourism as part of their Key Stage 4 learning. The qualification recognises the value of learning skills, knowledge and vocational attributes to complement GCSEs. The qualification will broaden learners' experience and understanding of the varied progression options available to them.	
How is it assessed?	
Components 1 and 3 are assessed through internal assessment. Internal assessment is through assignments that are subject to external standards verification. There is one external assessment. Component 2: Global Influences on Travel and Tourism The external assessment takes the form of a set task/external assessment, taken under supervised conditions, which is then marked and a grade awarded by Pearson. This is 40% of the final grade.	
How will we study the subject? What are lessons like?	
Most of your lessons in Travel and Tourism will be theory-based. In these lessons you will develop the skills needed for the industry: for example, your interpersonal, customer services and sales skills, as well as your knowledge of Geography.	
What skills will I develop if I study this subject?	
Learners will develop: <ul style="list-style-type: none"> • knowledge that underpins the effective use of skills, processes and attitudes in the sector such as the appeal of different tourist destinations to different types of customer, and the factors that influence travel and tourism • skills such as researching different travel and tourism organisations, the features of tourist destinations, and the products and services available to meet the needs of different customers • attitudes that are considered to be very important in the travel and tourism sector, including how to develop tourism while respecting the environment and local communities. 	
What jobs / opportunities can this subject lead to in the future?	
Jobs in hospitality and the travel and tourism industry. It also leads to continuing Travel and Tourism at A level. Travel and Tourism is designed to give students the opportunity to gain a realistic idea of what a career in the Travel and Tourism sector can offer. However, it is not just about gaining skills that can only be used in this sector. The course will give students the knowledge, understanding and skills that they need to prepare for employment in several industries such as travel and tourism, hospitality, events and business.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
As part of the course there will be a number of trips organised to investigate travel and tourism opportunities.	
Where can I find out more information? / Key Contacts?	
Please speak to Mrs Park for further information	

Subject:	History
Course:	GCSE History
Exam board:	Edexcel
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
<p>You will study different aspects of international history in the Twentieth Century, a study of Crime and Punishment from 1000-2000 AD and a study on Medieval England. The course is designed to help you understand the world that you are living in.</p> <p>We will investigate 'big' questions such as:</p> <ul style="list-style-type: none"> • Why is King Richard I seen as a model for Medieval Kings? • How close did we get to nuclear war? • How did the Cold War come to an end? • Why did people in Germany vote for Hitler? • How was Hitler able to dismantle German democracy in just 6 months? • How has the meaning and nature of crime changed in the last 900 years? • Why is Whitechapel so significant to our understanding of crime in the 1800s? 	
Who is this course suitable for?	
<p>It is a really interesting and engaging subject. If you enjoyed learning history in Year 7 and 8, you will certainly enjoy the history we teach at Key Stage 4. We are able to go into greater depth with the topics that we study. The GCSE topics cover a breadth of time from medieval to modern units. Many of the topics we study link in to modern day discussions and news, and you will see how important a knowledge of the past is for understanding the world we live in today.</p> <p>Any student who enjoys the study of History and want to pursue it further. The course does involve an amount of written outcomes, but students receive support and guidance to develop their writing and succeed.</p>	
How is it assessed?	
<p>There are three examinations for GCSE History, they will all be in summer of Year 11.</p> <ul style="list-style-type: none"> • Paper 1: Crime and Punishment through time 1000 AD – present. Historic environment – Whitechapel 1870-1900. Exam – 1 hr and 15 mins 30% • Paper 2: Medieval England: The Reigns of King Richard I and King John, 1189-1216 and Superpower Relations and the Cold War 1941-1991 Exam – 1 hr and 45 mins 40% • Paper 3 Weimar and Nazi Germany 1918- 1939 Exam – 1 hr and 20 mins 30% 	
How will we study the subject? What are lessons like?	
<p>Lessons are a lot like KS3 History lessons - lots of fascinating questions and answers about the past, engaging topics and varied activities. We have 5 lessons a fortnight for all our GCSE classes.</p>	
What skills will I develop if I study this subject?	
<p>You will develop valuable skills which are useful in many future jobs, whether they are related to the study of history or not. Many of our topics are set up as historical enquiries which ask big questions. We develop critical thinking skills by using our lessons to answer these big enquiry questions. In addition, we develop source skills throughout the course, considering what different sources can tell us, and how we can evaluate these to assess how reliable and useful they are to our studies. Students also learn to apply their historical understanding to make judgements on big enquiry questions, and develop written skills to communicate this understanding effectively.</p> <p>GCSE History should enable you to:</p> <ul style="list-style-type: none"> • Develop and extend your knowledge and understanding of specified key events, periods and societies in local, British, and wider world history; and of the wide diversity of human experience. • Engage in historical enquiry to develop as independent learners and as critical and reflective thinkers. • Develop the ability to ask relevant questions about the past, to investigate issues critically and to make valid historical claims by using a range of sources in their historical context. Develop an awareness of why people, events and developments have been given historical significance and how and why different views have been constructed about them 	
What jobs / opportunities can this subject lead to in the future?	
<p>History is a highly regarded academic qualification, which employers and universities value. History is a popular option at A Level at Little Heath School, and this is probably because...</p> <ul style="list-style-type: none"> ✓ Many students at Little Heath find the past genuinely interesting to study. ✓ You need its skills of analysis and interpretation for so many jobs in the modern world. 	

✓ Students who work hard go on to achieve excellent exam results in History, with a very high proportion achieving 4+, and over 1/3 achieving a 7 or above.

✓ History is such a well-recognised GCSE qualification; it is useful for a huge variety of careers. These include: Law, Humanitarian/charity, Teacher, Historian, Journalism, Armed forces, Museum curator, Archaeologist, Conservation, Writing, Acting/performance, Civil service, Politician, Business/finance

What enrichment / extra - curricular opportunities are available to me if I study this subject?

History teaches an enriched and exciting curriculum with opportunities to expand students' knowledge beyond the course. We link our lessons to fascinating historians and update regularly based on new research and findings. Students are guided to films, documentaries, books and podcasts that relate to our topics and beyond. We identify and explore links to current events and how events in history have influenced today. There is a possible enrichment trip to Oxford Castle in year 10 which gives students a fascinating insight into the workings of a prison through time.

Subject:	Computer Science
Course:	GCSE Computer Science
Exam board:	OCR
Qualification:	GCSE
Profiles:	Red Yellow
What will I study during the course?	
There are two components to this course, practical programming and computing fundamentals; The computing fundamentals course will include the structure of a computer, Data representation, computer networks, software and its development.	
Who is this course suitable for?	
Students who enjoy a challenge and problem solving as some of the concepts covered are very different to what you have learned before. You would also be interested in researching current events in computer science and keeping up with the latest technologies.	
How is it assessed?	
Computing fundamentals will be assessed in two examinations which will be taken in the summer of the final year of the course. The theory exams are each worth 50% of the final grade. Computer Science GCSE is one of the few subjects to have only one tier of entry at GCSE. This means that they can get the highest possible grade. All grades (9 to 1) are available to all students.	
How will we study the subject? What are lessons like?	
Lessons are delivered in a computer room via a VLE (virtual learning environment). You are expected to access the resources in class and at home if you have missed a lesson. Whilst the majority of work is accessed through the VLE, you are expected to also make notes in a note book.	
What skills will I develop if I study this subject?	
Logical thinking, problem solving and programming	
What jobs / opportunities can this subject lead to in the future?	
<ul style="list-style-type: none"> • Students on this course will develop the skills required for careers in IT and programming. • Computer Science is a very practical course with a strong emphasis on programming. • The course enables students to develop their logical thinking skills through understanding the steps that must be followed in order to reach a solution to a problem. • It will support techniques and theories which are important in other subjects, such as Science and Engineering. • It will give students a chance to learn the skills to control devices rather than simply using software created by other people • It will enable progression to A-level, vocational qualifications, industry recognised IT courses and provide skills that are desirable in the workplace 	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
Supporting/running coding clubs	
Where can I find out more information? / Key Contacts?	
Email Mrs Bailey (Head of Computing and ICT)	

Subject:	ICT
Course:	Level 1/2 Vocational Award in ICT (Technical Award)
Exam board:	WJEC
Qualification:	BTEC
Profiles:	Yellow, Green, Blue
What will I study during the course?	
Unit1: ICT in Society - which covers hardware, software, networking and jobs in the sector. Unit 2: ICT in Context - which covers spreadsheets, databases and image creation	
Who is this course suitable for?	
Students who would like to pursue a career in IT who want to focus on data handling over programming. They will have enjoyed working with spreadsheets in year 8 and want to advance their knowledge of this, extending into the capabilities of databases.	
How is it assessed?	
Unit 1 is a 40% written exam which is assessed in Y11. Unit 2 is an extensive three part coursework worth 60% The coursework is completed in year 10 and as it is worth 60% of the qualification, students will need to have a focused and resilient attitude in order to complete the work. In Year 11, students will focus on exam practice for the terminal exam.	
How will we study the subject? What are lessons like?	
Unit 1 lessons will be traditional style lessons which introduce theory that is checked/applied in written format; by answering knowledge and application style questions. Unit 2 is learning practical skills which requires demonstration and then practice. All lessons will be in a computer room and resources are hosted on Google Classroom.	
What skills will I develop if I study this subject?	
Literacy: reading and comprehension of a client brief, written communication IT skills: research, spreadsheets, databases, computer systems, images.	
What jobs / opportunities can this subject lead to in the future?	
<ul style="list-style-type: none"> • This is a good foundation course for the AAQ in IT: Data Analytics which will be running in the 6th form from 2025. • It is also a supporting subject for L3 apprenticeships in IT. • Practical skills in IT (spreadsheet and databases) are very desirable in the workplace. 	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
We are looking to develop trips to companies like Microsoft and Oracle. External speakers	
Where can I find out more information? / Key Contacts?	
Please speak to Mrs Bailey (Head of Department) The exam board specification link is here: https://www.wjec.co.uk/qualifications/level-1-2-vocational-award-in-ict/#tab_keydocuments	

Subject:	Languages
Course:	GCSE French / German / Spanish
Exam board:	AQA
Qualification:	GCSE
Profiles:	French – all, German + Spanish – Red, Yellow, Green
What will I study during the course?	
<p>Theme 1: People and lifestyle Topic 1: Identity + relationships Topic 2: Healthy living and lifestyle Topic 3: Education and work</p> <p>Theme 2: Popular culture Topic 1: Free-time activities Topic 2: Customs, festivals and celebrations Topic 3: Celebrity culture</p> <p>Theme 3: Communication and the world around us: Topic 1: Travel and tourism, including places of interest Topic 2: Media and technology Topic 3: Environment and where people live</p>	
Who is this course suitable for?	
<p>You should take a language GCSE if any of the following apply to you:</p> <ul style="list-style-type: none"> • you like learning languages; • you would like to work or travel abroad; • you would like to go to university or college – language GCSEs are regarded as a highly valuable qualification by universities and colleges and some universities have made them a requirement for admission; • you would like to give yourself an advantage when looking for a job in the future - language skills are important for many companies and organisations. <p>If you have enjoyed studying French and would like to learn a new language, Spanish and German would be suitable for you. Both languages are suitable for beginners. No prior knowledge of these languages is required, just a determination to work hard. Lessons will build on the skills that have been developed in French at KS3.</p>	
How is it assessed?	
<p>Speaking 25% Final Examination End of Year 11 Writing 25% Final Examination End of Year 11 Listening 25% Final Examination End of Year 11 Reading 25% Final Examination End of Year 11</p>	
How will we study the subject? What are lessons like?	
<p>Lessons will focus on the topics listed above and the 4 skills of listening, reading, writing + speaking will be taught with final assessments at the end of the 3 year course.</p>	
What skills will I develop if I study this subject?	
<p>being able to communicate both in speaking and writing and understand others when they speak or write in the target language</p>	
What jobs / opportunities can this subject lead to in the future?	
<p>teaching abroad or teaching a foreign language international relations travel opportunities working with people from different cultural and linguistic backgrounds working in the hospitality or travel industries</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>Lunchtime Spanish club runs weekly</p>	
Where can I find out more information? / Key Contacts?	
<p>Mrs Leach/Mr Martin or your class teacher</p>	

Subject:	Languages
Course:	FCSE Spanish
Exam board:	AQA
Qualification:	FCSE (Foundation Certificate of Secondary Education)
Profiles:	Green, Blue
What will I study during the course?	
<p>Theme 1: People and lifestyle Topic 1: Identity + relationships Topic 2: Healthy living and lifestyle Topic 3: Education and work</p> <p>Theme 2: Popular culture Topic 1: Free-time activities Topic 2: Customs, festivals and celebrations Topic 3: Celebrity culture</p> <p>Theme 3: Communication and the world around us: Topic 1: Travel and tourism, including places of interest Topic 2: Media and technology Topic 3: Environment and where people live</p>	
Who is this course suitable for?	
<p>We would like all students to have the opportunity to study a language, however we understand that the full GCSE may be challenging for some. The FCSE is a vocational course that offers the opportunity to study the same topics as the GCSE but it is assessed throughout the 3 years with coursework, rather than a final exam. Students are awarded a pass/merit or distinction at the end of the course. Students will be advised which of the 2 courses is most suitable for them.</p>	
How is it assessed?	
<p>Listening Three externally set assignments – 25% Reading Three externally set assignments – 25% Speaking One compulsory, externally set role play plus two internally set assignments – 25% Writing One compulsory, externally set translation plus two internally set assignments – 25%</p>	
How will we study the subject? What are lessons like?	
<p>Lessons will be based around the 3 themes listed above + coursework will take place throughout the 3 years of the course to assess learning.</p>	
What skills will I develop if I study this subject?	
<p>The ability to communicate both in writing + speaking in the language and understand both the written and spoken language</p>	
What jobs / opportunities can this subject lead to in the future?	
<p>Teaching abroad or teaching a foreign language international relations travel opportunities working with people from different cultural and linguistic backgrounds working in the hospitality or travel industries</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>Lunchtime Spanish club runs weekly</p>	
Where can I find out more information? / Key Contacts?	
<p>Ask your class teacher or Mrs Leach/Mr Martin</p>	

Subject:	Mathematics
Course:	GCSE Mathematics
Exam board:	AQA
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
You will study the following strands: 1. Number 2. Algebra 3. Ratio, proportion and rates of change 4. Geometry and measures 5. Probability 6. Statistics	
Who is this course suitable for?	
All students	
How is it assessed?	
<p>There are three equally weighted examinations covering the six key strands. PAPER 1 PAPER 2 PAPER 3</p> <ol style="list-style-type: none"> 1. Number 2. Algebra 3. Ratio, proportion and rates of change 4. Geometry and measures 5. Probability 6. Statistics <ul style="list-style-type: none"> • 33% of the total GCSE Written examination papers with a range of question types • No calculator is allowed 33% of the total GCSE Written examination papers with a range of question types • Calculator is allowed 33% of the total GCSE Written examination papers with a range of question types • Calculator is allowed • 1 hour and 30 minutes (both Foundation and Higher tier papers) • 80 marks available • 1 hour and 30 minutes (both Foundation and Higher tier papers) • 80 marks available • 1 hour and 30 minutes (both Foundation and Higher tier papers) • 80 marks available 	
How will we study the subject? What are lessons like?	
<p>A range of learning techniques will be used: teacher led activities, pair work, group work and project based investigational work.</p> <p>There are several highly effective and useful Mathematical packages that the school use both inside and outside the classroom and students enjoy a very interactive yet challenging experience throughout their GCSE. Students may have the opportunity to take on additional qualifications alongside their GCSE Mathematics and many students work hard to prepare themselves for Mathematics A level and Further Mathematics A level. Uptake for these courses in the sixth form is high.</p> <ul style="list-style-type: none"> • There are two different tiers of entry – foundation and higher. • Foundation tier: grades 1 to 5. Higher tier: grades 4 to 9. • The decision about your tier of entry will be made in discussion with you, your parents, and your teacher. <p>There is no course work for Mathematics; it is a purely exam based subject.</p>	
What skills will I develop if I study this subject?	
-Problem Solving -Real Life numeracy -Financial awareness	
What jobs / opportunities can this subject lead to in the future?	
Finance, Accountancy, Logistics, Engineering, Teaching	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>UKMT team maths challenge, Intermediate and Senior maths challenge</p> <p>Our most able mathematicians also study a Further Mathematics GCSE.</p>	
Where can I find out more information? / Key Contacts?	
<ul style="list-style-type: none"> • Talk to your Maths teacher • Talk to Mrs Andrews (Head of Mathematics) • Talk to Mrs Hames (Head of KS4 Mathematics) 	

Subject:	Media
Course:	GCSE Media Studies
Exam board:	Eduqas
Qualification:	GCSE
Profiles:	Red, Yellow, Green
What will I study during the course?	
<p>You will be studying a range of media forms across the three years of your GCSE Media course. You will develop your understanding of the four theoretical framework pillars; Media Language, Representation, Industry & Audience to analyse and develop your knowledge in specific media forms such as; Newspapers, Magazines, Advertising & Marketing, Films, TV, Radio, Video Games and the Online. You will then draw these links together to develop a cross-media production for either an independent or mainstream coursework brief.</p>	
Who is this course suitable for?	
<p>This course is suitable for students interested in the media, not just social media but everything that happens in the world told through different media forms. If you enjoy written subjects such as English & History, you will find your place in Media Studies as the course is weighted 70% theory. If you have a creative mind, you will enjoy the coursework element creating a product using your photography skills and technical editing software, although this is weighted less at 30%. The suitable candidate will have a likeness for written work and an element of practical.</p>	
How is it assessed?	
<p>You will sit two writ en exams exploring the theoretical framework, looking at Media Language, Representations, Industry & Audience and create a media-production that is a non-examined assessment (coursework). A breakdown is shown below:</p> <p>Component 1 – Exploring the Media (30%). Writ en examination. Assesses knowledge, understanding and skills by analysing media products. Media industries will also be assessed in relation to media form and audience.</p> <p>Component 2 – Understanding Media Forms and Products (40%). Writ en examination. The exam builds on component 1 with a focus on all theoretical frameworks, through an in-depth study of audio-visual products set by the exam board.</p> <p>Component 3 – Media Production (30%). Non-Exam Assessment. An individual media production for an intended audience, from a brief set by the exam board. This will need to demonstrate knowledge and understanding of media language and representation.</p>	
How will we study the subject? What are lessons like?	
<p>Studying the media is about decoding all the hidden and not-so hidden messages within media products and understanding the processes involved in creating them. You will explore the complex relationship between media producers and audiences and investigate how audiences respond in different ways to products. You will have the opportunity to develop your written skills using exam structure and techniques building on the knowledge learnt from your analysis of the different media forms. You will also get to work with our industry Technical Support Assistant (TSA) to develop skills in photography, and you will learn how to edit and design images using Photoshop and use recording equipment to create a multi-media production.</p> <p>Media Studies combines analytical skill and technical mastery with creative expression and personal insight. Media studies classes are generally interactive, with lots of discussions and development of your writing style looking into the theory of media. The best thing is, you already have some of the skills you will need to succeed before you even start!</p>	
What skills will I develop if I study this subject?	
<ul style="list-style-type: none"> • Critical Thinking/Building on discussion • Analysis • Research • Planning • Practical/Technical • Time Management • Essay Writing • Idea Development • Presentation 	

What jobs / opportunities can this subject lead to in the future?

There is a huge array of career opportunities in the media, and it's an industry that is growing very quickly; particularly in the South East. This course will build the best opportunity for you to develop your repertoire of skills that could lead you into the following careers amongst many more:

- Film and TV Directors,
- Fashion Photographers,
- Graphic Designers,
- Business Managers,
- Software Producers,
- Copywriters,
- Radio Broadcaster
- Set Designer
- Sound Engineer
- Advertising Specialists,
- Television Producers,
- Website Designers,
- Journalists,
- Teachers,
- Video Game Testers
- Special Effects Engineer
- Costume Artist
- Prosthetic Effect Artist
- Gaffer
- Jib Operator

Studying GCSE Media Studies will give you the opportunity to progress your knowledge to A Level study. The course will also help you hugely in other areas such as Film, English, Humanities and Social Sciences. Looking further ahead, over one hundred universities offer courses in Media, Communications and Cultural Studies in the UK. An A Level qualification in Media Studies, informed by study at GCSE level, helps you to move towards these courses, as well as to those in a range of other areas. There has never been a better time to become a Media Studies student.

What enrichment / extra - curricular opportunities are available to me if I study this subject?

Potential Trips in Media Studies include:

- A trip visit to Warner Brothers Studio – Harry Potter World (once every two-years)
- Sky Skills Academy
- Reading University Film & Media Workshops
- Museum of Branding & Advertising

Where can I find out more information? / Key Contacts?

You can talk to the following:

- Mr Chan (Head of Film & Media) – S8 or Media Office in Sixth Form
- Mrs Reeder (Technical Support Assistant) – Media Office in Sixth Form
- Your form tutor

Subject:	Music
Course:	GCSE Music
Exam board:	OCR
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
<p>There are three strands to GCSE Music; listening, performing and composing. You will be introduced to a wide variety of styles and genres of music from 1600 to the present day. These range from Pop Music to Film Music, including music for video and computer games, to Classical Music. The range of styles and genres will widen your appreciation for different types of music; you may learn to enjoy listening to a style of music that you had never previously considered! In lessons we will cover these styles and genres of music through activities that will not only improve your listening skills but also develop your composition and performance skills. During the course you will be able to perform in any style of music and on any instrument of your choice. You will also learn how to use music software to create your own compositions.</p>	
Who is this course suitable for?	
<p>The course is designed for people who take an active interest in Music and want to create and perform to and with other people. The course also develops a range of listening and analytical skills that are applied across a wide range of musical styles and genres. An ideal candidate will be willing to listen to a wide range of styles of music including Western Classical and World Music. Although it is not essential, candidates would benefit from receiving specialist tuition on their chosen instrument.</p> <p>If you enjoy the practical activities in Year 8, you are likely to gain a great deal from this option at GCSE.</p> <ul style="list-style-type: none"> • Some keyboard skills are useful (though not necessary), and you will develop these significantly during the course. • If you feel that your performance skills are not as confident as other skills, then you can complete your performance on the computer by producing a sequenced performance. • Keen singers are also encouraged to consider taking Music in Years 9,10 and 11. • It is not essential to receive specialist tuition on an instrument to take this course, although it would undoubtedly be advantageous. If you haven't had formal instrument/vocal lessons but are interested in starting them please see Miss Roberts (Head of Music) for more information. 	
How is it assessed?	
<p>The OCR Music GCSE course is essentially a practical course with 60% of the course involving individual and group performing and composition activities. The first two components (Performing Music and Composing Music) are completed under controlled conditions and externally assessed. This means that you will be given a set amount of time to complete your tasks during your lessons. You will need to prepare fully for these tasks as you will not be given extra time to improve your work. The listening exam takes the format of a written paper at the end of Year 11 and is worth 40% of the course. This paper is assessed externally.</p>	
How will we study the subject? What are lessons like?	
<p>Although the course is assessed through a mixture of practical and written, we teach most of the content through practical tasks to consolidate the listening and appraising content. You will also be given performance opportunities, both as a soloist and in ensembles. In addition to this, you will also be taught how to use a variety of different software packages to support the composition element of the course.</p>	
What skills will I develop if I study this subject?	
<p>During the course you will develop the following skills:</p> <ul style="list-style-type: none"> • performing skills individually and in groups; • composing skills to organise musical ideas; • an awareness of a variety of instruments, styles and approaches to performing and composing; • the identification of musical features, styles and genres; • communication, confidence and self-esteem through performance and composition activities <p>From the very start of the course, students should expect to apply themselves consistently to all areas of the course and regular practice on your chosen instrument is essential. • Homework will be regular and will either be practical (composing, practising instruments for performance pieces) or research-based work. • It will give you an opportunity to develop your creative side amongst other, more written based subjects. This ability to be creative is a skill that is deemed highly amongst future employers. So whether or not, you are</p>	

considering a career in music, Music is a course that can develop your confidence, creativity and communication skills, all of which are necessary in whatever career you decide to pursue.

What jobs / opportunities can this subject lead to in the future?

Any job that involves application of research, being creative, being self-motivated, being open to new ideas, working to a brief, working in a team and/or independently. However the most common jobs that GCSE Music students go on to do are: Professional Musician; Professional composer; Music Teacher; Music Therapist; Music Journalist; Sound editor; Sound technician; Concert promoter; Live sound engineer; Music producer; Song writer.

What enrichment / extra - curricular opportunities are available to me if I study this subject?

Opportunities to go on trips such as live orchestral concerts, join school ensembles, be involved in school concerts and productions, perform at external venues, perform in front of small invited audiences as well as larger paying audiences.

Subject:	Physical Education
Course:	GCSE Physical Education
Exam board:	OCR
Qualification:	GCSE
Profiles:	Red, Yellow
What will I study during the course?	
Physical factors affecting performance, socio-cultural issues and sports psychology and performing in physical education	
Who is this course suitable for?	
Pupils who are very actively involved in performing in two activities for clubs or teams outside of school, or in school teams. Human Anatomy is significant part of the examination work and pupils should be competent in science.	
How is it assessed?	
60% is examined (2 x 1hr exams) and 40% coursework (30% practical performance and 10% evaluating and analysing performance)	
How will we study the subject? What are lessons like?	
2 theory lessons and 3 practical lessons in year 9 Theory topics are split between the two exams Paper 1 is Physical factors affecting performance which includes; Applied anatomy and physiology & Physical training Paper 2 is Socio-cultural issues and sports psychology which includes; Socio-cultural influences; Sports psychology & Health, fitness and well-being.	
What skills will I develop if I study this subject?	
Understanding Anatomy and physiology, physical training, socio-cultural influences, sports psychology, health, fitness and well-being, a range of physical and tactical skills and evaluating and analysing practical performance.	
What jobs / opportunities can this subject lead to in the future?	
Sports therapy, Coaching, PE teaching, Physiotherapy, Sports management, Nutritionist, Sport Psychologist, working in the leisure industry	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
Wide range of practical activities – badminton basketball, table tennis, netball. We will also provide coursework support and revision sessions	
Where can I find out more information? / Key Contacts?	
Ask any of your PE teachers for more information or visit the OCR website – GCSE - Physical Education (9-1) - J587 - OCR	

Subject:	Physical Education
Course:	Sports Studies
Exam board:	OCR
Qualification:	Cambridge National
Profiles:	Yellow, Green, Blue
What will I study during the course?	
Contemporary issues in sport, sports and the media, coaching activities and practical activities	
Who is this course suitable for?	
Students who are interested in media in sport, contemporary issues in sport, coaching and performing practically Pupils who are very actively involved in performing in at least one activity for clubs or teams outside of school, or in school teams.	
How is it assessed?	
A mixture of assessment - 1exam, 2 pieces of coursework and 2 practical activities will be moderated	
How will we study the subject? What are lessons like?	
2 Theory lessons in year 9, 3 practical lessons with one focused on coaching The Units that we will be studying are - Contemporary issues in sport Performance and leadership in sports activities Sport in the media	
What skills will I develop if I study this subject?	
Coaching skills, understanding of contemporary issues in sport and sport and the media, a range of practical skills and tactics.	
What jobs / opportunities can this subject lead to in the future?	
Sports coaching, Sports management, work in leisure industry, work in sports media	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
Wide range of practical activities – badminton basketball, table tennis, netball. We will also provide coursework support and revision sessions	
Where can I find out more information? / Key Contacts?	
Ask any of your PE teachers for more information or visit the OCR website – Cambridge Nationals - Sport Studies Level 1/Level 2 – J829 (ocr.org.uk)	

Subject:	Religious Education
Course:	GCSE Religious Studies
Exam board:	Edexcel
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
You will study a range of religious, ethical and philosophical topics through the in-depth study of Christianity and Islam.	
Who is this course suitable for?	
All students	
How is it assessed?	
It is assessed in two 1hr 45minute exams, one covering all the topics we have covered in our study of Christianity, the other covering all the topics we have covered in our study of Islam.	
How will we study the subject? What are lessons like?	
We will investigate religious beliefs and practices, using holy texts, video clips, note-taking, supported practice questions and discussions. There will be lots of opportunity to explore and express your views on the topics that we cover.	
What skills will I develop if I study this subject?	
You will learn how to study religion, including beliefs and practices and how holy texts affect these. You will practice debating sensitive topics maturely and clearly, being able to explain and support religious and non-religious views on the topics we study, and the reasons you take one view to be better supported.	
What jobs / opportunities can this subject lead to in the future?	
This will be seen by educational establishments and employers as a GCSE qualification alongside others. Doing well in this subject shows that you can understand different points of view, make persuasive arguments, understand difficult religious and philosophical concepts as well as appreciate different ways of looking at the world. These are all skills that will support you in future courses and in any employment.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
We do a trip to a mosque and a trip to a church for GCSE Religious Studies students, which you can sign up to.	
Where can I find out more information? / Key Contacts?	
Talk to your RE teacher. Talk to Mrs Kukuk (KS4 Leader of RE) and Mr Eden (Head of RE)	

Subject:	Science
Course:	GCSE Combined Science
Exam board:	AQA
Qualification:	GCSE
Profiles:	All
What will I study during the course?	
You will study Biology, Chemistry and Physics units. The Biology units are Cell Biology. Organisation, Infection and response, Bioenergetics, Homeostasis and response, Inheritance and Ecology. The Chemistry units are Atomic structure, Bonding, Quantitative Chemistry, Chemical changes. Energy changes, Rates of reaction, Organic chemistry, Chemical analysis, Chemistry of the atmosphere and using resources. The Physics units are Energy, electricity, Particle model, atomic structure, Forces, Waves and Magnetism.	
Who is this course suitable for?	
Combined Science is compulsory unless you are doing Triple Science.	
How is it assessed?	
You will either be entered for the higher tier (grades 9-4) or Foundation tier (Grades 1-5). There are six exams at the end of Year 11 of 1 hour 15 minutes. There are two Biology, two Chemistry and two Physics.	
How will we study the subject? What are lessons like?	
You will have seven lessons a fortnight throughout Years 9, 10 and 11. • The Science department employ a whole host of different activities to develop your knowledge and understanding of the Science covered and the benefits and risks it brings to our everyday lives, including practical work, group discussion, PowerPoint, video, use of ICT, quizzes.	
What skills will I develop if I study this subject?	
<p>GCSE Combined Award Science should enable you to:</p> <ul style="list-style-type: none"> • develop scientific knowledge and conceptual understanding through the specific subjects of biology, chemistry and physics; • develop understanding of the nature, processes and methods of science, through different types of scientific enquiries that help you to answer scientific questions about the world around you; • develop and learn to apply observational, practical, modelling, enquiry and problem solving skills, both in the laboratory, in the field and in other learning environments; • develop your ability to evaluate claims based on science through critical analysis of the methodology, evidence and conclusions; • develop curiosity about the natural world, insight into how science works, and appreciation of its relevance to your everyday lives; • be inspired, motivated and challenged by the subject and its achievements. 	
What jobs / opportunities can this subject lead to in the future?	
If you get a 5+ on the higher tier you can go on to study A levels in Science. It is also a good starting point for vocational qualifications such as BTEC Health and Social Care. Science is one of the key GCSE qualifications that employees look for.	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
There are intervention sessions run towards exams and there may be an opportunity for visits to the Bayer labs in Reading.	
Where can I find out more information? / Key Contacts?	
Talk to your Science teachers. Talk to Mr Mullenger (Key Stage 4 leader of Science) Talk to Mr Harwood (Head of Science)	

Subject:	Science
Course:	GCSE Triple Science
Exam board:	AQA
Qualification:	GCSE
Profiles:	Red
What will I study during the course?	
<p>This course leads to three GCSEs - GCSE Biology, Chemistry and Physics. The units are as Trilogy Science. The Biology units are - Cell biology, Organisation, Infection and response, Bioenergetics, Homeostasis, Inheritance and Ecology. The Chemistry units are Atomic structure, Bonding, Quantitative Chemistry, Chemical changes, Energy changes. Rates of reaction, Organic Chemistry, Chemical analysis, Chemistry of the atmosphere and Using resources. The Physics units are Energy, Electricity, Particle model, Atomic structure, Forces, Waves and Magnetism.</p>	
Who is this course suitable for?	
<p>This course is available to our most able scientists as this will be an intensive course designed for students who will be looking to study Science at a higher post 16 level and beyond. You will be in Science for an extra five lessons a fortnight, so you must enjoy Science as well and be willing to work hard to achieve.</p>	
How is it assessed?	
<p>There are two tiers of entry : Higher Tier covers Grade 9-4, Foundation tier 1-5. You will be expected to work being entered for the Higher tier. You will be assessed at the end of Year 11 with two papers of one hour and three quarters for each Science.</p>	
How will we study the subject? What are lessons like?	
<p>You have seven lessons at the same time as Trilogy Science and five lessons within the option blocks. You have three different teachers as Biology, Chemistry and Physics are treated as three different subjects.</p>	
What skills will I develop if I study this subject?	
<p>GCSEs in Biology, Chemistry and Physics should enable you to:</p> <ul style="list-style-type: none"> • develop scientific knowledge and conceptual understanding through the specific disciplines of Biology, Chemistry and Physics; • develop understanding of the nature, processes and methods of Science, through different types of scientific enquiries that help you to answer scientific questions about the world around you; • develop and learn to apply observational, practical, modelling, enquiry and problem solving skills, both in the laboratory, in the field and in other learning environments; • develop your ability to evaluate claims based on science through critical analysis of the methodology, evidence and conclusions; • understand the material world and how scientific understanding is changing our lives and is vital to the world's future prosperity; • appreciate how the complex and diverse phenomena of the natural world can be described in terms of a small number of key ideas relating to the Sciences are interlinked. 	
What jobs / opportunities can this subject lead to in the future?	
<p>If you achieve Grade 5+ on the higher tier it can lead to you studying A levels in Science. A huge number of careers benefit from studying triple Science.</p>	
What enrichment / extra - curricular opportunities are available to me if I study this subject?	
<p>There will be regular intervention held towards the exam season. There may also be an opportunity to visit the Bayer labs in Reading as well.</p>	
Where can I find out more information? / Key Contacts?
